

Staff Psychiatrists Take Part in Photoshoot for LACDMH Hiring Efforts

By H. Chung So, Public Information Officer II

On Oct. 13, 2016, several LACDMH psychiatrists participated in a photoshoot as part of an ongoing recruitment effort to hire more physicians for the department.

The photos will be used in various recruitment marketing campaigns – including print materials, website advertisements and social media outreach – starting January 2017.

“The demand for licensed and well-trained psychiatrists is increasing, nationally and locally,” said Jeff Johnson, Psychiatrist Recruitment Coordinator. “Additionally, our department is striving to enhance access to services and meet the growing demands of the community, which also requires additional psychiatrists on staff.”

cultural backgrounds, will attract potential candidates in a personalized and sincere way, Johnson said.

Alisa Sabshin, M.D., a psychiatrist who has worked at LACDMH for 12 years, said she is happy to be a part of the photoshoot and the recruitment effort.

“The county is a great place to work,” said Sabshin. “The compensation is commensurate with your skills and experience, you work with an amazing team and every day you have the opportunity to make a difference in the lives of individuals and their families.”
